safeNet Depot Personnel Protection System

Emeg safeNet Depot Personnel Protection System (DPPS), a flexible user friendly intelligent network distribution system, protecting your depot operatives.

safeNet DPPS can interface with existing DPPS systems without the need for total replacement.

SafeNet ensures rail-vehicle movements in and out of depots are controlled with no risk to depot staff.

Enabling operatives to conduct train maintenance in a safe environment.

Complete Turnkey Solution

Emeg offers a full turnkey solution from initial design concept to full installation, maintenance and spares provision.

- Network Distribution System
- HMI c/w Touch Screen Technology available in maintenance sheds and at supervisors office
